Ivanhoe Standard Fixtures for Commercial Lighting

Ivanhoe suspension and ceiling fixtures for commercial lighting are made of separate parts of highest quality and are assembled by workmen of experience and skill. The specifications under which they are manufactured are approved by underwriters and by MAZDA lamp engineers. These general specifications are given here.

1. All Standard Line suspension fixtures are supplied complete with socket, hickey and wire, but wire and socket are not attached.

If no socket or wire is required, the order should specify bare. Z-hickey will be included. Wired fixtures will be supplied on order only.

2. All suspension fixtures in the Standard Line, with the exception of Number M-828, and the special suspension fixtures are supplied with adjustable suspension Z-hickey and screw ring canopy.

3. Medium Porcelain Socket D-26 is used in suspension

fixtures equipped with medium socket. Mogul Porcelain Socket D-27 is used in suspension fixtures equipped with Mogul socket.

4. Ceiling fixtures have special pig-tail receptacles and for this reason are not supplied without sockets. They are equipped with cross bars.

5. All fitters in the Standard Line are supplied with three set screws.

6. All canopies have eyelet near the bottom that canopy switches may be used. The switch may be attached to the Z-hickey. All ceiling fixtures with exception of M 829 are regularly supplied with knockout for canopy switch.

7. Canopies and holders are made of brass. All canopies and holders have rolled edges with the exception of number M-828 and M-829.

8. Fixtures are packed in an individual carton.

9. Finishes other than those listed will be quoted upon request.
